WALL STREET.

THURSDAY, April 19.

A tremendous feeling pervaded the stock market at the opening in consequence of the depressing influence of the S. N. Francisco catastrophe. The news from the Pacific coast was all absorbing, trading in stocks being of secondary consideration. Wall street is not yet in possession of sufficient information to form an adequate estimate of the financial effects of the ruin wrought in San Francisco, but it is obvious that these effects will be most serious and far-reaching. An especially gratifying piece of news this morning was a denial from Washington of the widely published report that the United States Mint in San Francisco had been destroyed. Both the Mint and Sub-Treasury in the destroyed building are said to be safe. These institutions contain \$10,000,000 in gold coin and currency. It has been given notice that so far as a national will permit he will help the victims and business community of San Francisco. In view of this unqualified attitude of the Secretary of the Treasury, surprise was manifested in Wall street when the statement came out on the ticker tapes that the National Bank of this city, had sent \$2,000,000 gold to San Francisco through the medium of the Sub-Treasury. The shipment of the gold will be just so much additional loss of cash to the New York banks. All of the stocks directly affected by the Pacific coast calamity opened weak this morning. United Pacific on sales of about 12,000 shares in the first ten minutes sold off 13-1/2. Southern Pacific, which it is feared, will suffer heavy losses from both earthquake and fire, declined 1-1/4. Atchafalaya fell off nearly a point, and Pacific Mail, on reports that valuable stock property in San Francisco had been destroyed, dropped 5 points. Pacific coast light transactions, declined 3 points on light transactions. Uncommon interest was taken in the shares of the United Railways Investment Company, which owns the electric traction system in San Francisco. There is \$500,000 of United Railways Investment stock listed in the New York Stock Exchange, and 90,000 of common and the balance preferred. This common stock sold at 92 yesterday morning. It opened today at 71 and immediately dropped to 62, subsequently rallying on small transactions. The preferred stock, however, from 85-1/2 to 86. President Patrick Calhoun, of the United Railways Company, whose headquarters are in this city, received word today from one of his lieutenants in San Francisco that the affairs of the United Railways system were in a bad way. Several power-houses have been seriously damaged and no cars can be run. Officers of the company were driven out into the street, but they saved valuable records and are organizing the company's employees to eat the proceeds

SOROSIS

Women's Shoe Department.

Third Floor

Ladies' Boots, Shoes and Slippers for travelling, walking, carriage or evening dress.

The excellent shape and attractive appearance of the fashionable shoe—particularly the United Pump or Walking Shoe—has made it a most conspicuous article of dress.

4.00 and 5.00 per pair

Boys' Shoes, 3.50 " "

JAMES MCGREERY & CO.

Twenty-third Street.

JAMES MCGREERY & CO.

Ladies' Suits.

Linen Tailor-made Suits, with short, medium and three-quarter length Coats.

12.50 and 19.50

Princess Dresses, made of handkerchief linen, pompadour mull and check cotton voile.

16.50

Linen and poplinette Walking Skirts.

4.50 and 5.75

Twenty-third Street.

JAMES MCGREERY & CO.

into available shape. Ladenburg, Thirman & Co., representing the principal stockholders of the United Railways Investment Company, have established communication with agents of the company in San Francisco and have also sent a contribution of \$5,000 to the relief fund in behalf of the investment company, the banking firm, President Calhoun and others. It is stated that the United Railways Company carried a little more than \$5,000,000 fire insurance on its properties in San Francisco. As the day wore on and each dispatch from the Pacific Coast emphasized the utter hopelessness of the situation in San Francisco all business spirit departed from the stock market and prices steadily sought the bottom. Feverish activity was shown in the big operators and the pool managers did their best to protect their holdings, but for the time being a large proportion of the speculative contingent appeared to have lost its nerve. Each succeeding bulletin from San Francisco but added to the general distress and gloom. The day was heavy and emphatic at the close.

The closing quotations and net changes of stocks from yesterday's final quotations are as follows:
